Software & Digital Experience Development

MAINTENANCE & SUPPORT SERVICE LEVEL AGREEMENT

Dreniak Limited — dreniak.com (both divisions and shared admin/CMS)

Client:	Dreniak Limited, represented by Darren Kamunuga
Service Provider:	VAIS Applied Intelligence Systems
Effective date:	Date of countersignature below
Related agreement:	Dreniak Website Build Quotation, UGX 1,400,000, dated 10 September 2026
Annual fee:	UGX 500,000 per 12-month term

1. Purpose

This Service Level Agreement ("SLA") sets out the ongoing maintenance and support VAIS Applied Intelligence Systems ("VAIS") provides to Dreniak Limited ("the Client") for the dreniak.com website following completion of the build covered by the referenced quotation. This SLA governs the standing annual maintenance arrangement; it does not re-describe the build itself, which is documented separately.

2. Term & Renewal

This SLA runs for an initial term of twelve (12) months from the effective date and renews automatically for successive 12-month terms unless either party gives notice of non-renewal in accordance with Section 10 (Termination).

The annual maintenance fee of UGX 500,000 is payable in advance for each 12-month term, invoiced at the start of the term and at each renewal.

3. Services Included

The annual fee covers, across both the Dreniak Engineering and Dreniak Asset Management divisions and the shared admin/CMS system, under a single combined fee:

- Content updates requested by the Client (text, images, listings, and similar content already supported by the existing site structure)
- Bug fixes and correction of defects in existing functionality
- Security patches and routine dependency/library updates
- Uptime monitoring of the live site
- Backups of site content and database
- Addition of simple new pages that use the site's existing design components and content patterns

New features, new functionality, or substantial redesigns are outside this standing scope and are handled as Change Requests under Section 5, except where VAIS determines a request can reasonably be completed with minimal additional effort, in which case VAIS may complete it under the standing fee at its own discretion.

4. Service Request Volume

Up to eight (8) discrete service requests per calendar month are included within the standing fee. A "request" is a single, clearly defined task — for example, one content update, one bug fix, or one simple page addition.

Requests beyond eight in a given calendar month, or a request that would reasonably require a disproportionate amount of time relative to a standard request, may be carried over to the following month or billed separately, at VAIS's discretion and communicated to the Client in advance of any additional charge.

5. Change Requests (Out-of-Scope Work)

New features, major functionality, substantial redesigns, and previously identified future-phase work (including the authenticated client portal referenced in the original build documentation) are quoted and billed separately from this SLA, based on the scope of the specific request.

Where a requested feature is small enough to implement with minimal effort, VAIS may elect to complete it under the standing monthly request allowance in Section 4 rather than issuing a separate charge, at VAIS's discretion.

6. Response & Resolution Targets

Support requests may be submitted at any time; there is no fixed support-hours window. Response and resolution targets are governed by severity rather than time of submission, as follows:

Severity	Examples	Target first response	Target resolution
Critical	Site fully down, security incident, data loss risk, admin login inaccessible	Within 4 hours	Within 24 hours or mitigated
High	A major feature broken (e.g. enquiry form, division page failing) but the site is otherwise up	Within 1 business day	Within 2–3 business days
Medium	A non-critical bug, or a moderate content/feature change	Within 2 business days	Within 5 business days
Low	Minor content updates, small cosmetic or low-impact feature requests	Scheduled into the monthly request queue	Within 5–7 business days, queue permitting

These are target response and resolution times, not guaranteed outcomes independent of factors outside VAIS's control (see Section 8 and Section 10). Urgent, higher-severity issues are prioritised ahead of lower-severity requests already in the monthly queue.

7. Support Channel & Access

Service requests are submitted through the agreed communication channel between the parties. VAIS's maintenance covers the site's codebase, database, and hosting configuration, provided VAIS retains continued access to the relevant accounts (including but not limited to the hosting platform, database/backend service, and domain/DNS management where relevant to a specific fix).

Where VAIS's access to a required account is revoked, not provided, or lapses, VAIS is not responsible for any resulting delay in service delivery until access is restored.

8. Client Responsibilities & Third-Party Costs

The Client is responsible for all third-party hosting, database, storage, domain, email, and related service costs associated with the site, including any increase in those costs arising from growth in traffic, usage, storage, or added features. VAIS's annual fee covers VAIS's own labour and services only, not third-party platform costs.

The Client is responsible for maintaining active accounts and timely payment of any third-party services the site depends on; VAIS is not responsible for service interruption caused by non-payment or account issues on the Client's third-party accounts.

9. Fees & Payment

Annual maintenance fee: UGX 500,000, payable in advance for each 12-month term (initial term and each renewal), by bank transfer or mobile money.

Change Requests under Section 5 are quoted and invoiced separately, prior to work beginning on the specific request, unless otherwise agreed in writing for a given engagement.

10. Termination

Either party may terminate this SLA, whether at the end of the then-current term or otherwise, by providing at least one (1) month's written notice to the other party. Following notice, the parties will hold a meeting to discuss and agree the terms of cancellation, including handover of access, outstanding fees, and any transition arrangements.

Termination of this SLA does not affect any separately agreed Change Request work already in progress or invoiced under Section 5.

11. Limitation of Liability

VAIS is not liable for outages, data loss, or service interruptions caused by third-party infrastructure providers (including but not limited to the hosting platform, database/backend service provider, domain registrar, or email provider) that are outside VAIS's direct control.

Except in cases of gross negligence or wilful misconduct, VAIS's total liability under this SLA in any 12-month term is limited to the annual maintenance fee paid by the Client for that term.

12. General

This SLA governs the ongoing maintenance relationship described above and does not alter the terms of the original build quotation, which remains a separate, already-fulfilled engagement. Any amendment to this SLA must be agreed in writing by both parties.
